Agate, Inc.

Attn: Jim Uhl
President

Dear Jim:

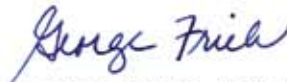

I am pleased to provide a letter of recommendation for you and your firm.

Our relationship can be measured in decades, and without question, you and your firm have been a great example of professionalism and progress.

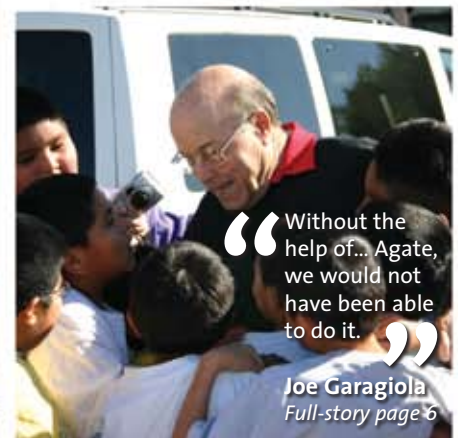

Since our beginning, I have witnessed your firm grow to its current level. Measured in bonding capacity, Agate has become a major general contractor with bonding capacity that exceeds \$ 20,000,000 per project and an aggregate work on hand of \$80,000,000.

Thank you for allowing me to be a part of this exceptional company.

Very truly yours,

George Friebe CPCU ARM AFSB

“Without the help of... Agate, we would not have been able to do it.”

ST. PETER MISSION - BAPCHULE, AZ

DATE: December 18, 2000

I would like to inform you that of all the pre-engineered metal building companies we have used or attempted to use on this project only **one** performed this work with little to no issues, and that one was AGATE. They were given the Utility Building and the speed in which it was erected by AGATE erector Sure Steel out of Salt Lake City, Utah was a testimony to how well it fit.

I would not hesitate to recommend AGATE as a supplier in the future for our upcoming projects. I would however be very careful or who is selected as an erector. If AGATE recommends them, then I feel certain that they would be of the caliber we would require to meet our rigid safety and quality requirements.

Pete
 I just wanted you know that working with Sandy was a great experience. I have been in contracts and purchasing for quite some time. Sandy has proved herself to be the consummate professional. I have dealt with many others that could learn from her style and positive attitude.

Allow me to extend kudos to your company for having hired such an individual.

Respectfully,

ROMÁN E. UDABE

 Dear Agate Building's Inc.
 Thank you for helping me during the North American Indigenous Games at Denver, Colorado.
 Sincerely,
 Brienne Clark

Mark Adams
 Agate Inc.

June 29, 2006

Dear Mark:

Last year Agate Inc completed the concrete tractor repair pad at one of Empire's Mesa shops. This project included hardened and reinforced concrete with a steel rail system built in. The area has held up well and we are very pleased with the work. Also the concrete work that Agate did in constructing our new truck loading dock has exceeded our expectations and is working very well.

Mark, it is a big advantage dealing with a contractor like Agate Inc who understands the extreme loads that are generated from the large construction and mining equipment that Empire services on a daily basis.

Sincerely,

 Randy Lamb
 Director of Properties

Dear Jim:

On behalf of the Salt River Police Department, I wanted to express our gratitude to Agate Steel for donating a metal gate for our Police gun range.

For many years our Police gun range and surrounding area would experience trespassers, vandalism and littering because there wasn't a high quality secure gate to keep unauthorized persons from entering this restricted area. The solution was relatively simple, however not possible within my budget until you Jim and Agate Steel generously granted our wish, fabricating a top-of-the line quality metal gate. This quality gate will protect our gun range, our Agate Steel metal shade awning and the desert environment for many years to come.

Sincerely,

 Gary D. Tappewalker

Dear Sir:

I wanted to take the time to thank you and your company for the recent job you did at the Marine Corps Air Station here in Yuma, Arizona. The job was to build a structure to house a High Mobility Multipurpose Wheeled Vehicle (HMMWV) "HEAT" (HMMWV Egress Assistance Trainer) simulator. To put this in layman's terms the simulator simulates a rollover of a HUMVEE type vehicle. If you would like to read more on this subject please go to the internet address listed: http://www.marines.mil/units/martrgac/Pages/Prd_deploytrainingbringsHEAT.aspx. We should all realize that the thing we have done here may save our "own" young men and women. Although I worked and talked to several of your employee's and want to thank them, I would especially like to thank Denise Facinelli (site supervisor) for a job well done. I hope we can continue to do business in the future and look forward to working with your company. Please take the time to thank everyone personally for me. Please feel free to call or email, if I can ever be of any help to your company

A Division of Samaritan Health Services

Excellence in Caring

August 13, 1987

I highly recommend Agro Construction for any construction job related to hospital work. They are entirely sensitive to hospital needs. They know all the problems which occur during hospital construction, and, as you know, there are few contractors who recognize these needs.

I have found Agro Construction to be honest, willing and an aggressive construction company.

I will not hesitate to give them an opportunity to bid on any Samaritan Health Service work.

Sincerely,

Fred W. Held, Director
Engineering/Construction
SHS/GSMC

REPLY TO
ATTN OF: LGSHE

SUBJECT: Letter of Appreciation on Performance of the Agro Construction and Supply Company, Project MI 84-1597

TO: 82FTW/LGCC

I wish to express my appreciation of the performance of Agro Construction and Supply Company on the construction of the bomb build-up pad and cover. Their on-site supervisors, Mr. J. B. Uhl and Mr. Fred Palm, were very cooperative, polite, and always coordinated their desires or needs. I feel the building meets all design criteria and, in some cases, exceeds it. Better yet, they completed construction well ahead of schedule. Their performance is an example of the free enterprise system of awarding the contract to the lowest bidder being a good idea.

March 30, 1994

Agate Construction Company did an excellent job in the construction of our church building. The on-site construction superintendent was very cooperative and efficient in his work. We are very pleased with the final product.

There was some concern on the part of the congregation regarding the aesthetics of a steel structure, but Agate Construction, along with the architect did a splendid job of giving us a building we are very proud of today. From the beginning to the completion, we experienced a great deal of cooperation from Agate. I would recommend that you consider using Agate for your next building project.

Sincerely,

Maricopa County

Dear Mark,

Since I have looked at your fabrications at Sahuaro and Canyon lakes, which are endorsed by the Sheriff's Office, and since we are planning to submit a grant for this boathouse, I do not have to solicit several cost estimates. Thus I am seeking your services solely. I am sure that the granting institution will question any costs that seem exorbitant, and this may be a factor in our winning the grant, so I trust that you will be "competitive."

In my effort to find quality vendors, I happened to run across Agate Construction. Agate has done a number of jobs for us, both large and small, both of which have turned out fine. I found that working with Agate was a relief. A company I didn't have to watch every second of the day, with employees that I could rely on.

In closing, it is good to be able to find a company that is honest, reliable, sincere, trustworthy and that puts a priority on quality.

Paul Ives

Subject: Thanks for a job well done!

Jim: Your fabrication crew was able to produce and ship the rigid frames and wide flange columns for our Phoenix project in time, and the quality of the fabrication was great. All of your troops were good to do business with. Please pass on my regards for a job well done. Let's do it again real soon!

Thank you,
Lynn E. Mattingly, President

Dear Mr. Uhl:

Thank you for your letter of March 12. We are pleased that you enjoy working with us and shortly we will have two more projects at the Mecca site for you to bid.

Your work to date has been exemplary, and we appreciate it. We hope to have other work that we can tie in with you as time goes along.

Yours sincerely,

W. S. McLeese

RECEIVED
JAN 18 2007
FNU

Our Family would like to extend our most sincere Thank You for your generous gift of sponsorship for Bill Hodges' participation in the 2007 "Run for McKenzie". The McKenzie Monks Foundation is a 501(c)(3) non-profit organization. ID # 20-0806404.

Thank You seems like such small words to say to you when we feel such a large amount of gratitude. We are very grateful for your donation. Together we are making a difference in children's lives who are coping with cancer.

Subject: Freeport McMoRan Copper & Gold, Inc.
Concentrate Leach Project
Morenci, Arizona

Dear Dan:

The Tucson office of Aker Kvaerner Metals is issuing the enclosed memento to our key partners on the Morenci Concentrate Leach Project to commemorate the successful execution of the project.

The project is an important one for our client and a milestone in the industry. We sincerely appreciate your contribution.

Sincerely,

Rick Driver
Director of Procurement

RAILROAD EMERGENCY REPAIR

Subject: BTW Bridge Repair - Project Closeout Meeting
Importance: High

Gentlemen;

As all of you know, the railroad bridge is back in service. Arizona Eastern Railway (AZER) has been moving concentrate and anodes in and out of the smelter over the revitalized bridge span. All structural repair work for the bridge took 6 1/2 days, an incredible feat given the circumstances. Your help in restoring the bridge back to service is greatly appreciated.

Regards,

Mike Moss

NATIONAL PARK SERVICE
Glen Canyon National Recreation Area
Box 1507
Page, Arizona 86040

March 22, 1999

Agate Construction completed the project on time and met all specified quality requirements. Two major change orders were incorporated into the project and both change orders were reasonably priced. Agate Construction exhibited an unusual awareness of safety issues and maintained a safe work environment.

I do not hesitate to recommend Agate Construction to any project owner and hope to work with this firm again in the future.

Ken Earlywine
Park Engineer

I have to say that working with you and Agate has been one of the better experiences in my PM construction career. You have been good to work with, responsive to questions and change requests, and of course, it's always good to get paid on time! I hope we have come through for you too. I sincerely hope we can do another project together.

On January 1, 1989, Agate Construction completed our new 25,000 sq. ft. Manufacturing Plant and Office Complex. Mark Adams of Agate was instrumental in all phases of the project from initial design through completion.
All phases of the project were completed very professionally as well as on time.
I look forward to our next project with Mark and Agate.
Sincerely,
BEAR CAT MFG.
